

West Virginia: Comparison of Planned Parenthood and Federally Qualified Health Centers (FQHCs)

While Planned Parenthood is the nation's largest abortion provider and performed 327,653 abortions in 2013,¹ federally qualified health centers (FQHCs),² which operate in service sites in both rural and urban locations, offer low-income populations health services similar to those provided by Planned Parenthood, but do not perform abortions.

- In West Virginia, there are 27 FQHCs operating in 243 service sites and serving 383,485 individuals per year.³
- In West Virginia, there is one Planned Parenthood center.⁴
- Nationwide, there are about **13 times the number of FQHC service sites** (9,170) than Planned Parenthood centers (about 700).
- Nationwide, FQHCs serve 21.1 million individuals per year, **nearly eight times more individuals** than are served by Planned Parenthood centers (2.8 million).⁵
