Federally Qualified Health Centers (FQHC) help those in need

- FQHCs are community-based health care providers vetted and funded by the federal government to provide [comprehensive healthcare](#) services to low-income, vulnerable, and underserved populations.
- Charlotte Lozier Institute's analysis includes only FQHC sites that specifically advertise women's health services, including OB/GYN care, well-women care, and prenatal care.
- FQHCs provide services on a sliding scale to make healthcare affordable and widely available to those in need.

Pro-Life Pregnancy Centers help those in need

- Pro-life pregnancy centers support pregnant women facing difficult circumstances with medical care and referrals, education, mentoring, and material support including diapers, car seats, and clothing.
- In 2019, locally-operated pro-life pregnancy centers [served roughly 2 million women, men, and youth with nearly \\$270 million in services](#) at little or no cost.

- Analysis shows pro-life pregnancy centers partnered with pregnant women considering abortion to [save more than 800,000 lives in a 5 year period.](#)

Planned Parenthood performs abortions

- Abortions were [96.4% of all pregnancy resolution services offered by Planned Parenthood](#), according to its 2019-2020 report. Prenatal care, miscarriage care, and adoption referrals together accounted for less than 4% of Planned Parenthood's pregnancy care services.
- Planned Parenthood affiliates are performing more abortions even as the total number of patients goes down, according to a [Charlotte Lozier Institute analysis](#) of publicly available abortion data from 19 Planned Parenthood affiliates covering 40% of locations in FY2020. One affiliate reported a 31% increase in abortions despite a 12% decline in patients.
- Planned Parenthood has [closed several facilities](#) as a result of reviewing ["patient needs"](#) in [light of the Dobbs](#) Supreme Court case.

FQHCs compared with Planned Parenthood facilities

In 2019, a year with publicly available service data from both [Planned Parenthood](#) and FQHCs:

- Of all locations, including sites not specifically included in the map, FQHCs had 932,683 patient visits for mammograms, **compared with 0 reported by Planned Parenthood**, whose facilities are **not [FDA certified mammography facilities.](#)**
- Of all locations, FQHCs provided more than [1.9 million pap tests](#), which is **7 times more than provided at Planned Parenthood.**
- Of all locations, FQHCs saw [14,206,602 patients using Medicaid](#), which is **nearly 6 times the total number of all Planned Parenthood clients.**
